

PRESS RELEASE M12

On 27 and 28 September 2016, a monitoring meeting of Ecosign Project was held in Bucharest (Romania). For two days, Ecosign partners discussed the results obtained to date and planned the tasks to be undertaken during the next 6 months.

Ecosign is a 3-year project co-funded by The Erasmus+ Programme of the European Union with the core objective to eliminate the lack of knowledge and skills of designers in industries related to eco-design and sustainable production. The target groups are:

- Vocational Students
- Food packaging Designers
- Fashion and industrial textile designers
- Designers of electronic/electrical goods

The final aim of Ecosign project is to develop and recognize a Joint Curricula on product eco-design by implementing innovative methods in e-learning and recommendations for face-to-face learning that will be available on the Ecosign platform.

Ecosign is divided into 9 Work Packages each focusing on a specific goal such as Definition of competence and skill needs, Design and Organization of Training paths, training course development, etc. which will be executed during 36 months (starting on 1st November 2015) by the 12 partners forming part of the project consortium: VET providers (Cetem, Centrocot, Ecoevalind, University of Maribor), VET Authorities (AICQ- SICEV, CPI, CNFPO-SEF, CSFPM), Sector Experts (CTC, Iba, Tecos, TexClubTec).
